MINOX
VISIBLE INNOVATION

Product Information

MINOX BV 8x42 and BV 10x42 – Orange Camo

Ideal for driven hunts and tracking

Signal-colored camouflage products for hunting and outdoor activities are now very popular. In Europe, the demand for technical equipment or clothing of a camouflage design has risen substantially over recent years. Responding to this trend we offer now our proven BV binocular line in an orange camouflage look. Especially when out on driven hunts or tracking in dense vegetation the new binoculars BV 8x42 and BV 10x42 Orange Camo provide even greater reliability and flexibility.

Lightweight and robust, extremely compact and easy to handle – these are features of the BV 8x42 and BV 10x42 binoculars that boast a state-of-the-art optical system. Multi-coated lens elements ensure high light transmission and a natural color rendition to provide an exceptional viewing experience. Thanks to the roof prisms with phase-correction coating the user can enjoy an image with outstanding detail rendition and rich contrast, even in low light conditions.

Shock absorbing rubber armoring protects the precision optics, even if the going gets tough, and provides a good grip at all times thanks to its non-slip surface. On the inside the binoculars are protected against the penetration of dust and water by an innovative sealing technology, making them watertight up to a pressure of 0.3 bar or to a depth of 3 meters. A nitrogen filling on the inside guarantees permanent corrosion protection and prevents fogging of the glass surfaces, even under severe temperature fluctuations.

The scope of delivery includes a wide neoprene strap as well as an ever-ready case.

Technical Data	**BV 8x42 BR Orange Camo**	**BV 10x42 BR Orange Camo**
